

TODAY'S SOLUTION FOR YESTERDAY'S TECHNOLOGY

IT End-of-Life Risk Assessment.

Why not **choose** the name

you can trust... **Hesstech!**

Hesstech has led the industry for over 10 years developing asset retirement solutions to address data security, environmental compliance, and cost control. Below are **ten questions** to consider or ask **your IT End-of-Life (EOL) vendor** before you process your next load of IT equipment.

Have you sufficiently addressed...

1. Risks of loss and data protection while equipment is in transit to your EOL vendor, even if the data was 'erased'?
2. Methods of validating Data Eradication procedures are 100% effective?
3. Maximizing the cash returned when re-marketing or buyout of your IT EOL assets?
4. EOL compliance with SOX, HIPPA, the Graham-Leach Bliley Act, regarding all confidential data and disposal activities?
5. Secure storage for records of ownership and liability transfer in the event of a catastrophic occurrence?
6. When an indemnification or Certificate of Recycling is not sufficient in the event of data theft or if improper disposal occurs?
7. How to improve reporting and the manner in which you receive processing information?
8. Reducing logistics and processing costs by centralizing EOL activities with fewer or a single vendor?
9. Bundling EOL activities with other IT lifecycle services to further reduce costs?
10. The correct questions to ask an Electronics Recycler in an audit?

We want to help you understand the attributes needed in selecting the best company to meet your IT End-of-Life needs. Perhaps you'll consider Hesstech after scheduling a meeting with us? We'll come to you, and provide a concise **complimentary IT EOL Risk Assessment** of your current process. Hesstech provides a simple, hands-on stewardship through the IT End-of-Life process, and can ensure you are doing all the right things operationally, environmentally, and financially.

Please call or email us to be connected with your Regional Sales Manager to schedule your Free IT EOL Risk Assessment.
